

METHOD AND APPARATUS FOR CONTROLLING A CELL RESELECTION MODE

Abstract of the Disclosure

5 A communication system controls a cell reselection mode of a mobile station while the mobile station resides in a cell by determining a cell reselection mode of the mobile station, determining whether the mobile station is experiencing a change in radio frequency (RF) conditions, and when the mobile station is experiencing a change in RF conditions, instructing the mobile station to change a cell reselection mode used by the
10 mobile station.
